a. North America Datum of 1983 (NAD 83) State Plane, Washington South FIPS 4602 coordinate system.

b. North American Vertical Datum of 1988 (NAVD88).

c. Negative values indicate absence of HSU at that location.

d. Elevations of the geologic units obtained from ECF-HANFORD-13-0029, *Development of the Hanford South Geologic Framework Model, Hanford Site, Washington*. Generally, wells with MOS less than the top of RLM, where present, and less than top of Rwia otherwise, were classified as “LU/CR” (i.e., below RLM/in Rwia). However, additional sources of information were also incorporated to make the determinations, including relevant guidance documents, borehole logs, prior use for water-table mapping, and subject matter expert (SME) knowledge.

GWIA = Groundwater Interest Area

TOS = top of screen elevation

BOS = bottom of screen elevation

MOS = middle of screen elevation

HEIS = Hanford Environmental Information System

RLM = Ringold formation member of Wooded Island – lower mud unit

Rwia = Ringold formation member of Wooded Island – unit A

HSU = hydrostratigraphic unit

UU/MU = Upper unconfined aquifer and middle unconfined aquifer

LU/CR = Lower unconfined aquifer and confined Ringold aquifer
